

Scratch help

machinelearningforkids.co.uk encourages the use of Scratch for building games and interactive projects using the machine learning models that students create.

The ScratchX instance is available at <https://machinelearningforkids.co.uk/scratchx>

If you have any problems getting it to work, the tips below might help.

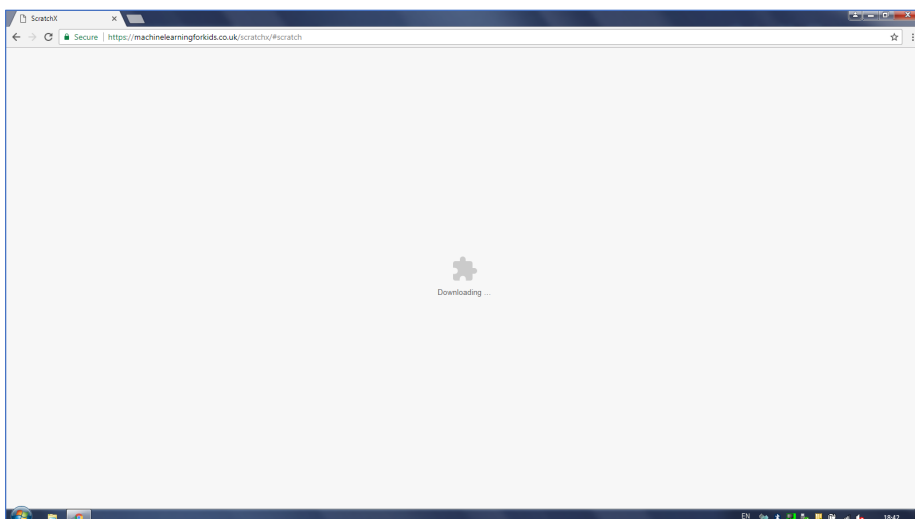

If you see “Click to enable Adobe Flash Player”...

ScratchX is an Adobe Flash app – so you need the Adobe Flash Player.

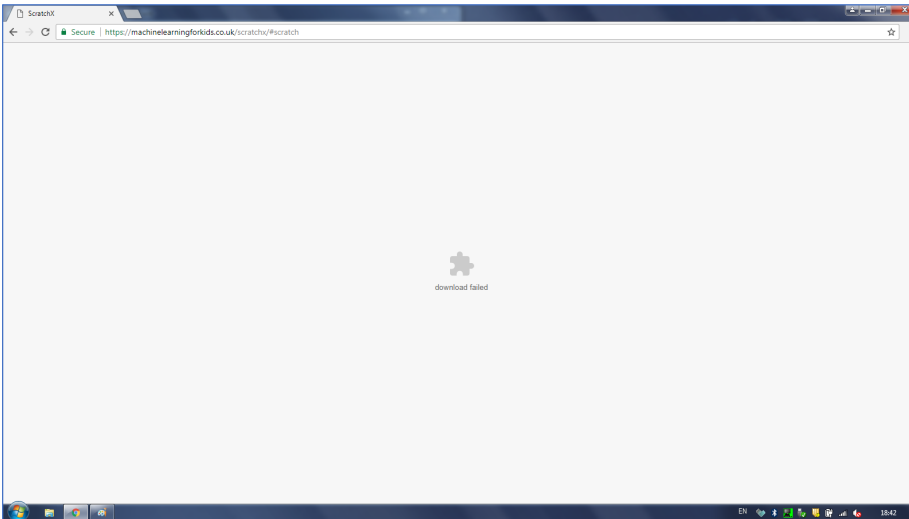

Just follow the instructions to enable Adobe Flash.

If you see “downloading”...

Adobe Flash is downloading. Please wait.

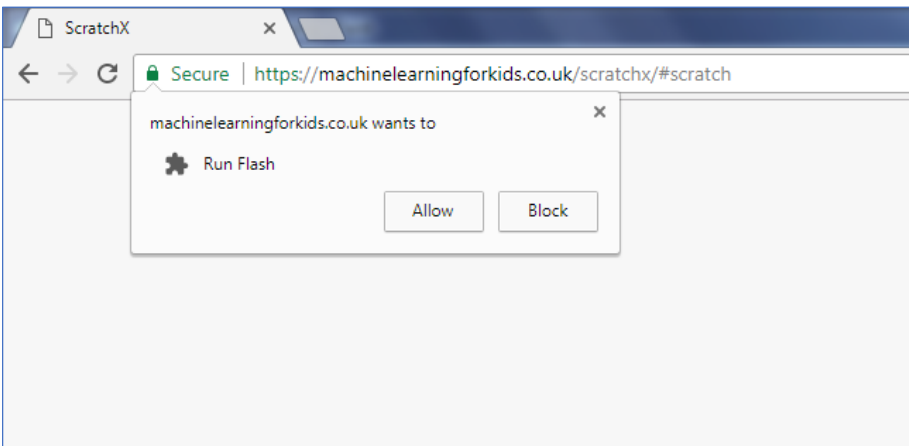

If you see “download failed”...

You’ve not been able to enable Adobe Flash.

The way to fix this will vary depending on your web browser, but the simplest approach might be to visit get.adobe.com/flashplayer and follow the instructions there.

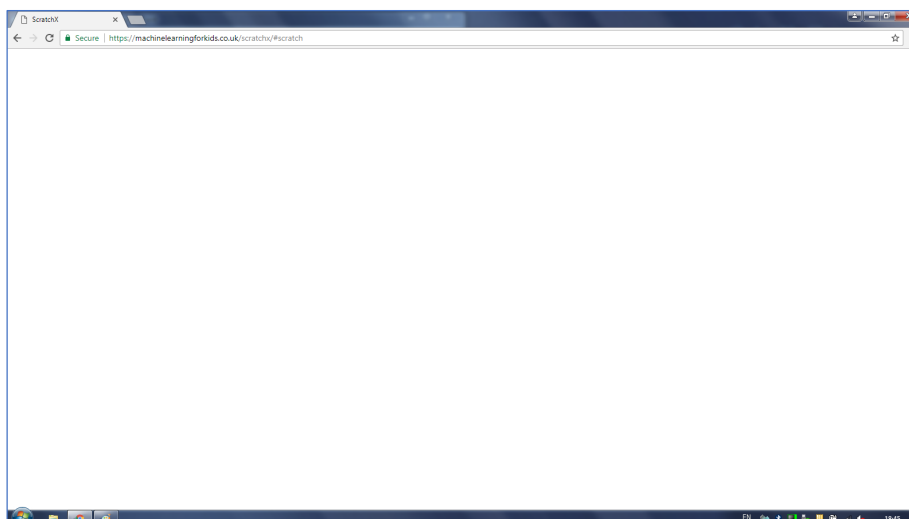

If you see “machinelearningforkids.co.uk wants to Run Flash”...

ScratchX is an Adobe Flash app – so you need to enable Adobe Flash Player to use it.

Please click Allow.

If you see a blank page after enabling Flash...

The first time you use this Scratch app, you may notice a short delay while the app is downloading.

Please wait – it should only take a moment.
